

Berlin Group NextGenPSD2

Changelog

PSD2 Compliance Berlin Group - Changelog 1.13.0

- [PSD2 Compliance Berlin Group - Changelog](#)
 - [Introduction](#)
 - [Provided support for wider range of character sets and formats for parsing the Distinguished Names](#)

Introduction

The updated version published is following the international Berlin Group NextGenPSD2 standard, version 1.3. Please note that the version in the URL will not change. The "v1" will be kept in all existing URLs.

[Provided support for wider range of character sets and formats for parsing the Distinguished Names](#)

Support to match various / wider range of formats of the same Distinguished Name information (one that is coming from the certificate and the other which is coming in the signature header) that comply with the [RFC 2253](#) specification.

See chapter "Signing Request with QSealC - AIS/PIS/CBPII/SBS" in the [Implementation Guidelines](#) for more info on signature header
